STAFF SYSTEM

Improve your own happiness in the office space, combine the sequence that really suits this space, and show a stylish and elegant combination of personality.

Staff system

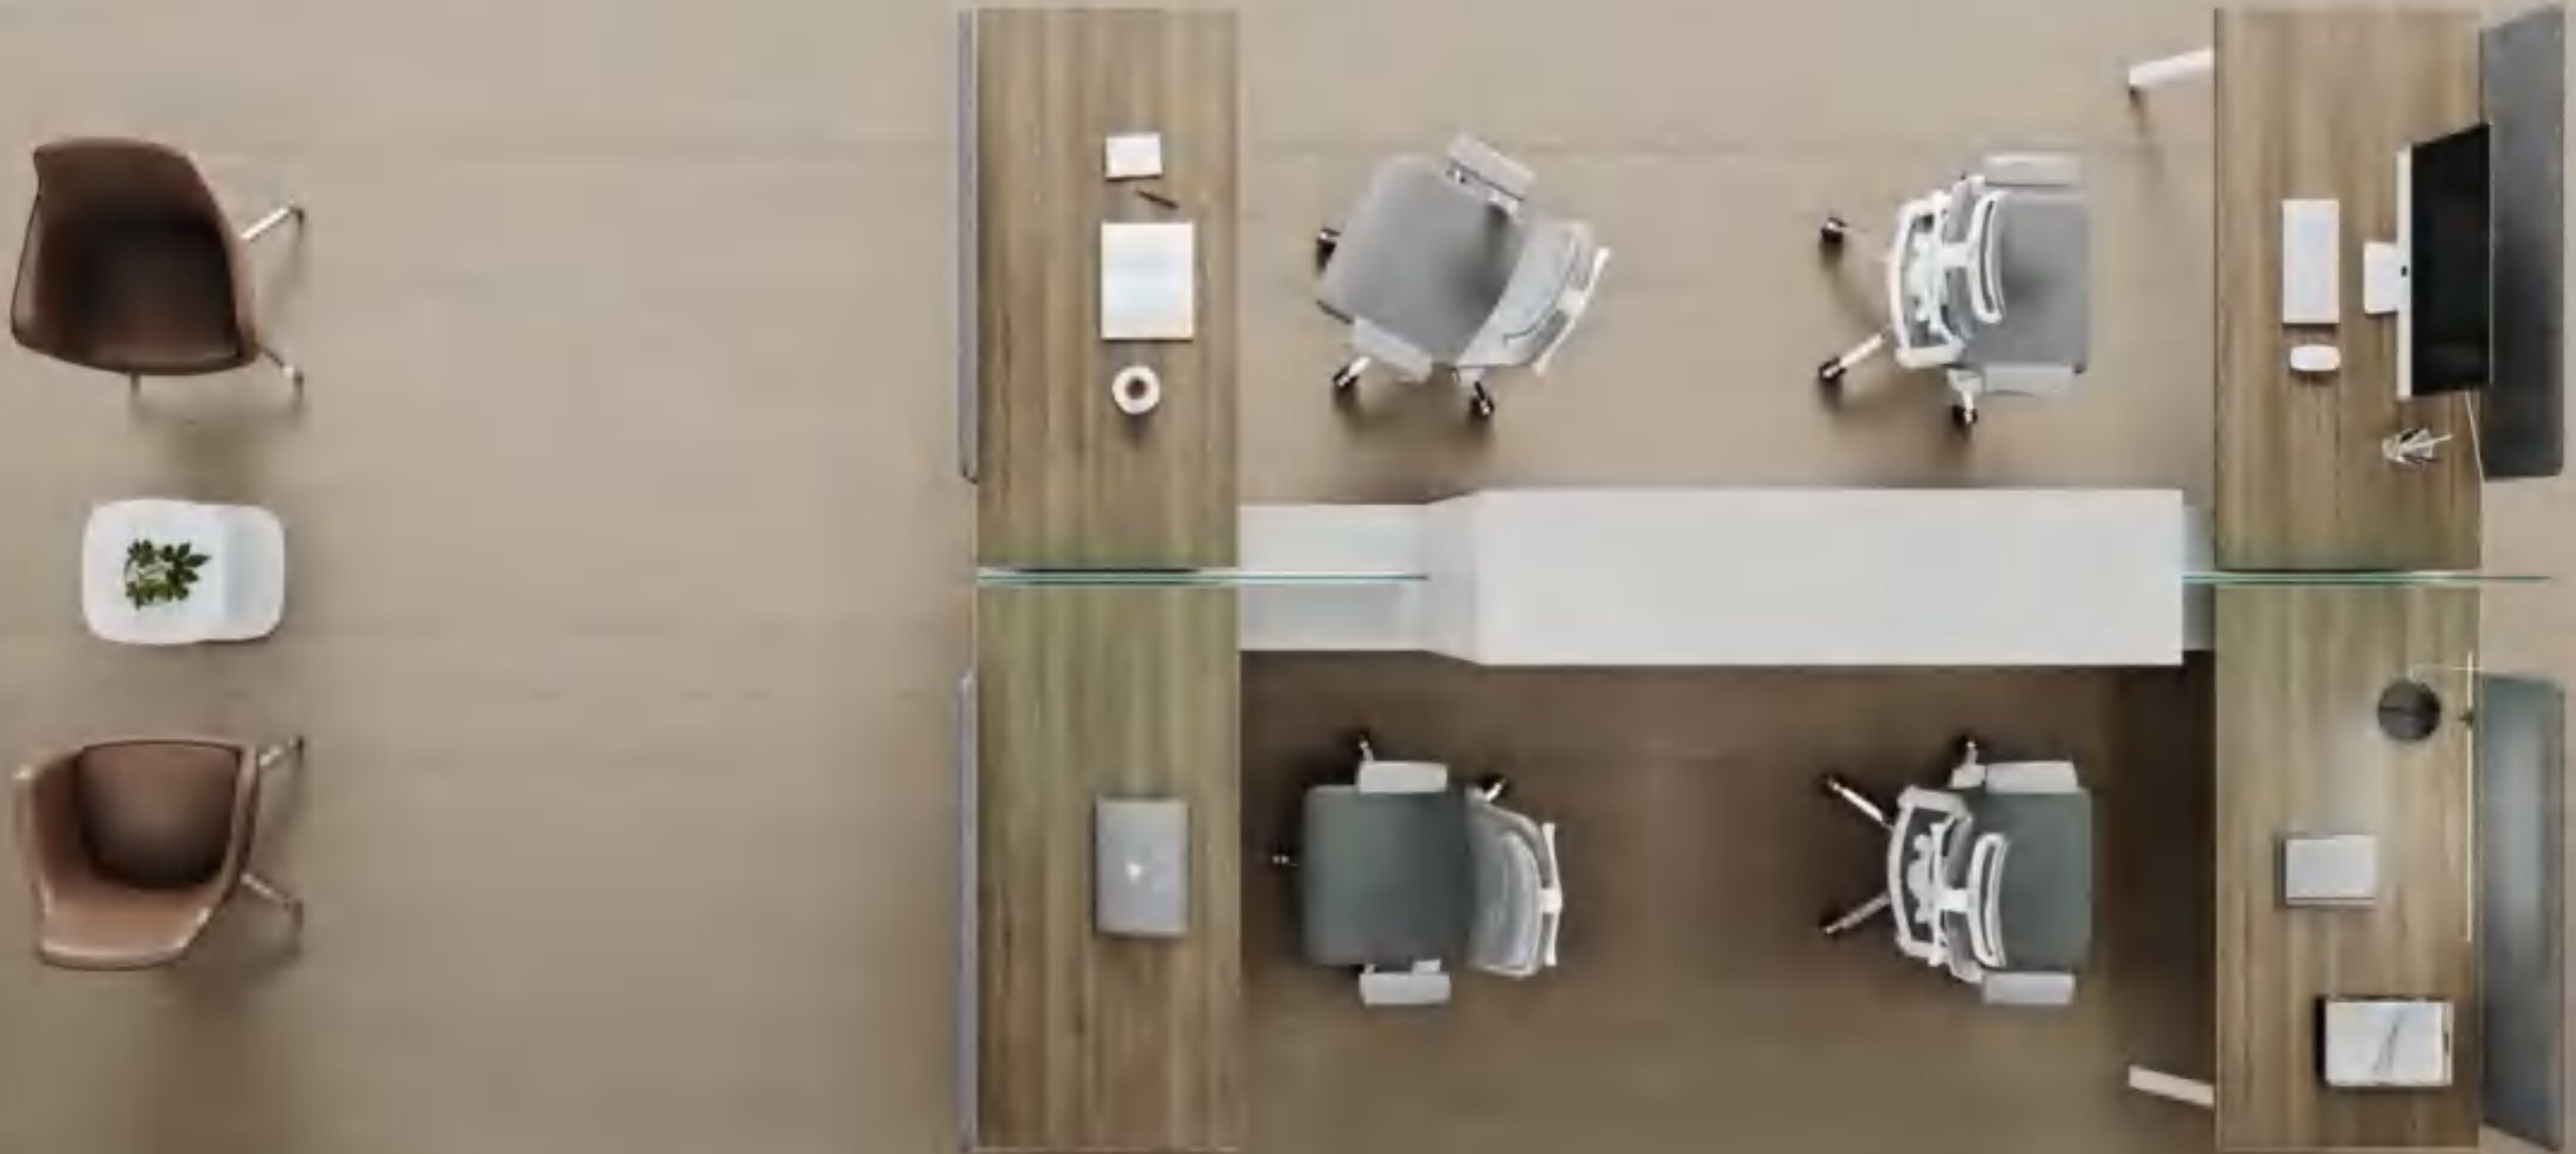

Nothing is more enjoyable than office furniture that suits you.

Powerful in flexibility, rejecting workplace constraints
灵活的张力，拒绝职场的拘束

Combination art, modular space
组合艺术，模块化空间

Office diversification, the pattern becomes bigger
办公多元化，格局变大

Privacy and functionality are fully expressed

私密性与功能性得到充分表达

The understanding of lines constitutes the style of concise space.

对线条的理解，构成了简洁的空间的风格

Instead of traditional floor-to-ceiling screens, fashion
separation has special attitude

代替传统的落地屏风，时尚分隔有态度

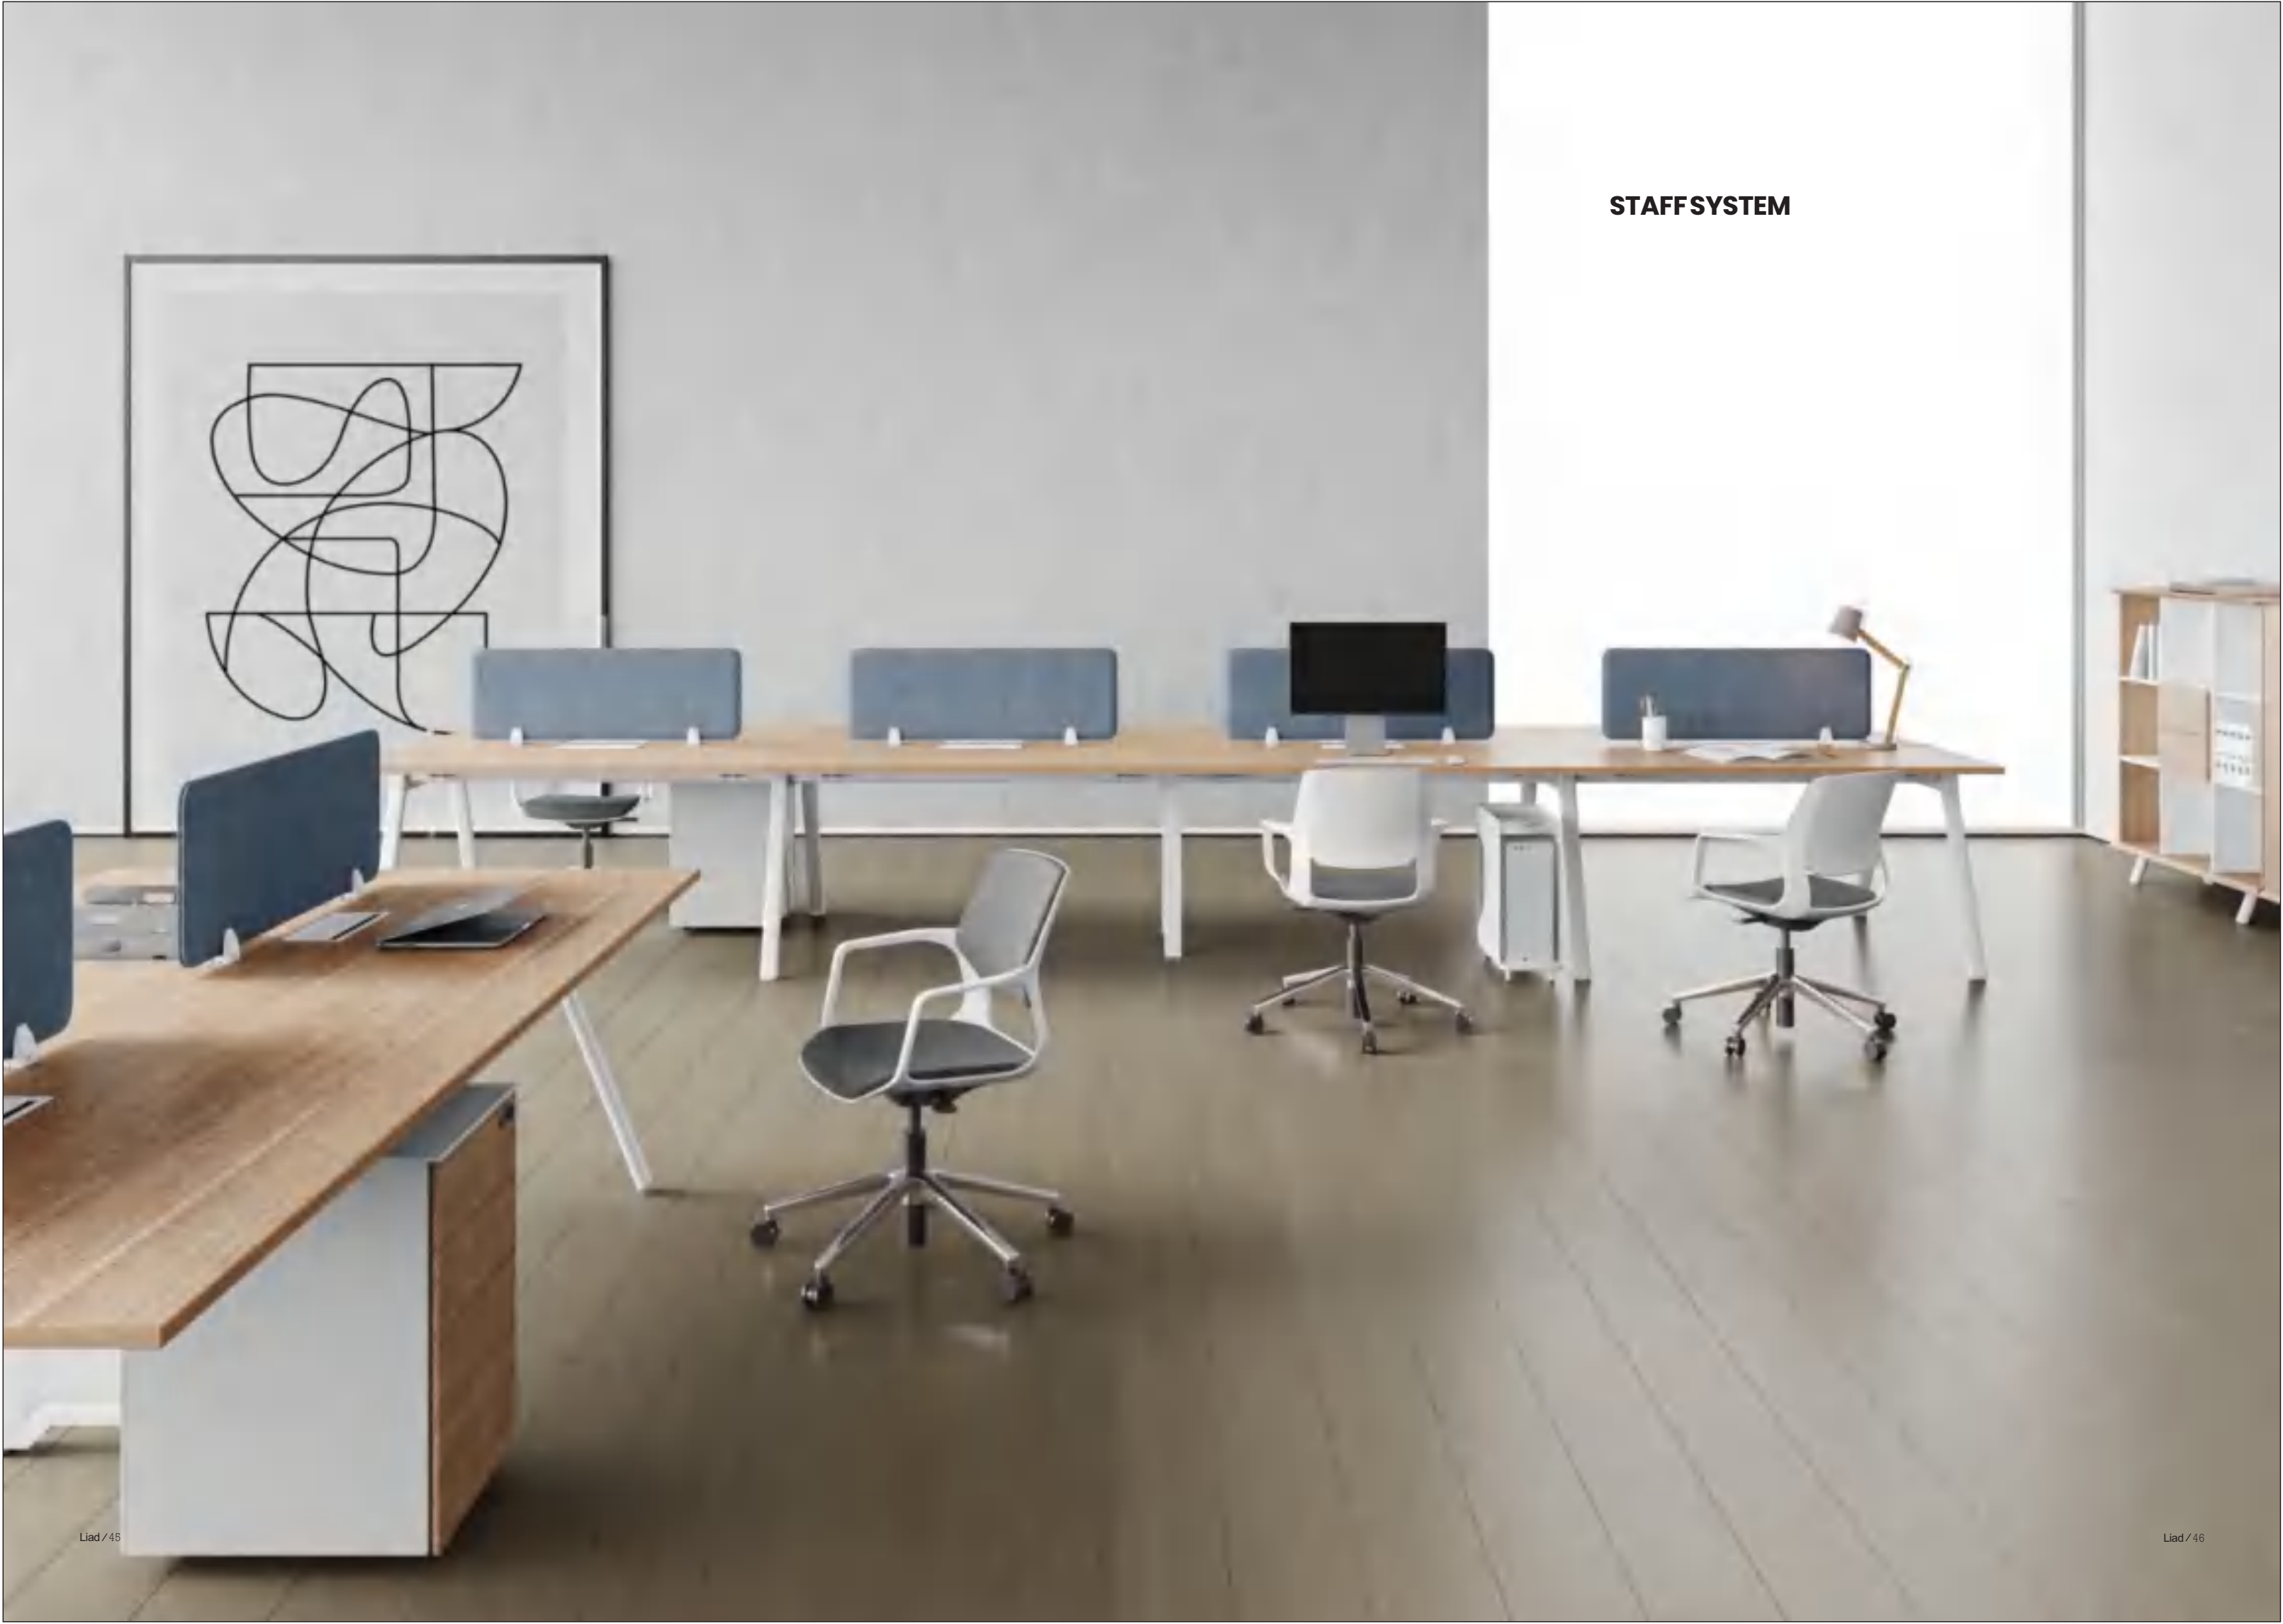

STAFF SYSTEM

Simple fashion sense, it conforms to the aesthetics of modern people
简约时尚感，符合现代人的审美

STAFFSYSTEM

The office shows a simple and modern urban sense,
relaxed, harmonious, and lively, the environment tends to be humanized,
handsome, professional and reliable.

办公室展现了简洁的现代都市感，轻松、和谐、明快、环境趋向人性化，帅气十足，专业可靠

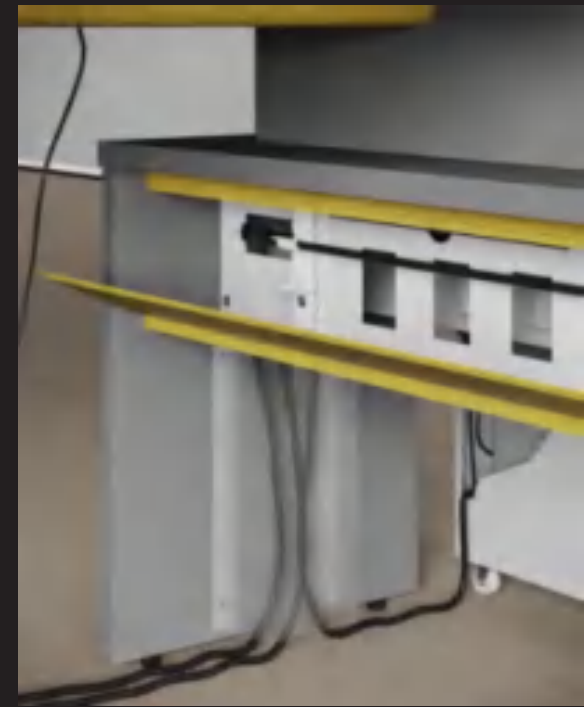

There must be a place that belongs to us in order to best express our creativity and stimulate our ideas.
This is why we must have our own private space, not a fully open space.

必须有一个属于我们自己的地方，才能最好地表达我们的创造力，激发我们的想法，
这就是为什么我们必须要有属于自己的私密空间，而不是全开放式的空间。

cable management

Utility model appearance and patented wiring island, brand-new design, beautiful appearance, practicality and connotation, bid farewell to messy wiring troubles, the wiring board can be removed by pulling it out.

It is convenient to arrange wiring and check wiring problems. The 86-socket can be installed outside or inside. Does not affect the arrangement of lines.

实用新型外观与专利走线岛，全新的设计，美观大方，实用有内涵，告别杂乱的线路烦恼，线板上提外拉即可取下来。方便整理线路与检查线路问题，86插座可外装也可内装。丝毫不影响整理线路。

FABRIC SCREEN ■ 布艺屏风

Do not miss any small details, reasonable layout, designers through their own design language, design novel and practical products, harmonious color matching, liberate your vision

不放过任何一处小细节，合理布局，设计师通过自己的设计语言，设计出新颖实用的产品，和谐的配色，解放你的视觉

High-equipped movable cabinet with password lock, bid farewell to the key to enter the digital age, three-layer drawers provide convenience when you organize things, and the classification is simple and clear. The side hook can hang the bag, saving storage space.

高配带密码锁活动柜，告别钥匙进入数字时代，三层抽屉给你整理物品时提供方便，分类简洁明了。

侧边挂钩可悬挂包包，节省放置空间

Conference会议桌

With the rise of the "purpose economy" and continued rapid development, companies will face numerous challenges. They need to re-examine ethics, beliefs and values. They also need to fill in the time difference between work behaviors and expectations. Both people and space may be dynamically adjusted. Time cannot be reset. When formulating new policies, consider the transformational relationship between people, space, and time. Once the motivation for pursuing the meaning of work is integrated into the corporate culture, it is possible to reshape our working methods and spatial forms, as well as in limited Produce greater efficiency in time.

“目的经济”崛起并继续迅速发展，企业将面对重重挑战，需要重新审视操守、信念和价值观，还需要填补工作行为和期望之间的时间差异，人与空间都有可能动态调整，唯独时间不可重置，在制订新政策时，思考人、空间、时间的转换关系，一旦追寻工作意义的动力融入到企业文化中，就有可能重塑我们的工作方式与空间形态，以及在有限的时间内产生更大的效能。

people-space-time
Combined with
applicable office products**

这一切，是人——空间——时间
加上适用的办公产品组合成

Life Science—Blurring the boundaries, imitating the technology industry

生命科学——模糊界线， 仿效科技行业

Precision medicine—therapies that analyze the genetic and physiological characteristics of patients by combining new diagnostic and treatment tools—is reshaping the field of medicine and its facilities, blurring the line between life sciences and healthcare. As smart devices connect precision medicine with patients as consumers, artificial intelligence will handle more and more laboratory procedures. The laboratory environment is also being changed by smaller and smaller devices. These extremely flexible spaces can be matched with non-laboratory functions to support teamwork and accelerate development and execution.

Life science companies and universities are following the example of the technology industry, setting up incubators and accelerator spaces to support startup companies, and also setting up innovation centers to make R&D results faster to market. Interdisciplinary "matrix teams" are emerging, and there are multiple modes of participation and combination of physical/virtual, industry / outside industry. In addition, life science companies are being attracted to comprehensive "science villages", which can be seen in life science centers in the United Kingdom, the United States, and Singapore. They have also become the focus of investment in other East Asian and Middle Eastern countries, usually in association with universities.

精准医学——通过结合新型诊断和治疗工具来分析患者的遗传和生理特征的疗法——正在重塑医学领域及其设施，模糊了生命科学和医疗保健之间的界线。随着智能设备将精准医学和作为消费者的患者连接起来，人工智能将处理越来越多的实验室程序。实验室环境也正在被越来越小的设备所改变。这些无比灵活的空间能够和非实验室功能搭配，来支持团队合作，加速发展和执行。

生命科学公司和高校正在效仿科技行业，设立孵化器和加速器空间以支持创业公司，还设立创新中心从而使研发成果更快投入市场。跨学科的“矩阵式团队”正在兴起，有实体 / 虚拟、业内 / 业外的多种参与组合模式。另外，生命科学公司正在被吸引至综合性“科学村”，这些在英国、美国、新加坡的生命科学中心都能看到。它们也成为其他一些东亚和中东国家投资的重点，通常与高校联合。

**The new main business is rebuilding old buildings,
Inject new vitality into the city.
Owner services—reshuffle to increase revenue**

新业主正在改建旧建筑， 为城市注入新活力。 业主服务——重新洗牌以增加收益

Owners are turning to office space that is quickly handed over and can be used at any time to meet the needs of tenants more quickly. The emerging on-demand office space platform "shares" third-party facilities, while other platforms share cars and beds. Such sharing can better meet the needs of tenants who wish to stay for a short time. With the development of virtual reality technology, site visits will become a thing of the past, and virtual technology will take its place as a tool for tenants to evaluate multiple rental houses.

Convenience facilities and services will become a bigger selling point for office buildings. The lobby and other public areas have borrowed from the characteristics of hotels and residential real estate-by adding coffee shops, restaurants, retail stores, conference centers, concierge services, etc. for owners and managers Create new profit opportunities. At the same time, it is expected that these office buildings will provide additional convenience for each tenant, help manage the brand facilities of the merchants, and provide customized services for the employees of the merchants.

In other words, the owners realize that their office building is part of a comprehensive area or it is necessary to provide missing mixed functions. The future trend is to integrate the environment and activities, attract the flow of people at night and weekends, open the lobby and balcony, encourage synchronization with neighbors, and increase the goal value of both parties.

业主正转向快速交接并且可随时使用的办公空间，以更快满足租户的需求。新兴的按需办公空间平台“共享”第三方设施，其他平台则共享车子和床位。这种共享能够更好地满足希望短暂停留的租户的需要。随着虚拟现实技术的发展，实地考察将成为过去，虚拟技术取而代之，成为租户评估多个出租屋的工具。

便利设施和服务将成为办公楼更大的卖点，大厅和其他公共区域都借鉴了酒店和住宅地产的特点——通过增加咖啡店、餐厅、零售商店、会议中心、门房服务等为业主和管理者创造新的盈利机会。同时也有望期待这些办公楼为每个租户提供额外的便利，帮助管理商户的品牌设施，为商户的员工提供定制服务。

也就是说，业主意识到他们的办公楼是综合区域的一部分或者有必要提供缺失的混合功能。未来的趋势是：将环境和活动整合到一起，吸引夜晚和周末的人流，敞开大厅和阳台，鼓励与邻居同步，提高双方的目标值。

consumer goods-- Break down barriers and promote cooperation

消费品—— 破除障碍，促进合作

R&D, testing, and sales of consumer products are no longer considered "silos," and the physical boundaries between these activities are disappearing. In terms of integrating hands-on and collaborative practices into the office space, share Work space, maker movement, and translation medicine play the role of pioneers. Artificial intelligence including human-product interaction and the Internet of Things can improve workflow and understand consumer engagement Degree, and then become an important factor in this field.

研发、测试和销售消费品不再被视为“筒仓”，这些活动之间的物理界线正在消失。在将动手实践和协作实践融入到办公场所方面，共用工作空间、创客运动以及转译医学扮演了先行者的角色。包括人与产品间互动和物联网在内的人工智能能够提高工作流程和了解消费者参与度，进而成为这一领域的重要因素。

PEOPLE AND SPACE

Consumer product manufacturers use social and behavioral research to evaluate their market and adjust product development. The demand for consultants and analysts in the industry is increasing. The background of these professionals has far exceeded the traditional professional knowledge, including mathematics. Scientists, meteorologists, economists, professional scholars and post-gender psychologists. Now, as the focus shifts from creating space to providing support for experts, the placement of experts has become a major issue in the workplace.

消费品厂商利用社交和行为研究评估他们的市场和调整产品研发，对行业内顾问和分析员的需求正在日益增长，这些专业人士的背景也已远远超过传统意义上的专业知识范畴，包括了数学家、气象学家、经济学家、专业学者和后性别心理学家。现在，随着焦点从创造空间转向为专家提供支持，安置专家们便成为了工作场所领域的一大课题。

CONSULTING—— NEW TALENTS, NEW CHALLENGES 咨询——新才能，新挑战

Analytics enables data to be filtered in real time on the basis of algorithms, generating useful insights to improve people's personal experience in living, working, and entertainment. Designers will use these findings to understand user needs. Since data collection is integrated into the environment itself, people's presence in the environment will generate real-time data points.

The number of freelancers and contract workers continues to increase, and various organizations strive to integrate them, which will have an impact on design and operations. Similarly, since mobile workplaces are everywhere, people expect to maintain some basic workplace values, such as health, commitment, brand, and work model support—no matter where they choose to work.

In multinational companies, teams scattered around the world need to cooperate effectively, which is compounded by language and cultural differences. It would be helpful to have real-time translation capabilities in collaboration tools. Automation is both a blessing and a threat to employees. This emerging issue will become increasingly important in the next decade.

分析学使得数据能够在算法的基础上进行实时筛选，产生有用的洞见，以改善人们在居住、工作、娱乐场所的个人体验。设计师会利用这些发现来理解用户需求。由于数据采集融入到了环境本身，人们环境中的存在会产生实时数据点。自由职业者和合同工不断增多，各个组织也努力使他们融入，这会对设计和运营带来影响。同样地，由于移动工作场所随处可见，人们会期望能够维护一些基本的职场价值观，如健康、承诺、品牌、工作模式支持——无论他们选择在哪工作。在跨国公司内，分散在全球各地的团队需要有效合作，这又因语言和文化差异变得更加复杂。使协作工具拥有实时翻译功能将会大有帮助。自动化对于员工来说既是福祉，也是威胁，这一逐渐突显的问题在未来十年将会变得愈发重要。

Technology-driven flexible socialization space break through the barriers that block creativity.

Media-support real-time integration

科技驱动灵活社交化空间破除了阻塞创造力的隔阂。媒体——支持实时融合

The media office places great emphasis on production speed and agility, not only because of the unpredictable introduction of new equipment and channels, and the rapid changes in self-directed and self-identified audience tastes. Media facilities need to adapt to this.

"Gamification"-teamwork in online games for competitiveness-is being adopted by other fields to increase participation, solve problems faster, and create shared experiences. At the same time, online gaming itself is a huge industry, with an amazing number of players, and the fans attracted by the tournament can fill the entire football field. In order to expand and improve competitiveness, game companies will adopt the most aggressive space design strategy in the media and technology industries. Taking into account flexibility and customization, sharing and individualization, high-tech and human-centered space design can accelerate innovation.

This innovation is in progress. iPhone has become part of the device portfolio. Virtual reality is a wild card, creating an immersive experience. The integration of digital and physical is an important way to achieve this, and virtual reality is another way. The media tend to converge, combining unconnected chains to attract the attention of the audience. As the number of chains increased, so did the demand for convergence. As a result, the silo collapsed and innovation accelerated.

媒体的办公场所非常强调生产速度和敏捷性，这并不仅仅因为无法预测的新设备和频道的引入，以及自我导向和自我认同的观众口味的快速变化。媒体设施需要适应这一点。

“游戏化”——在线游戏为拥有竞争力而进行的团队协作——正被其他领域采用以提高参与性，更快解决问题和创造共享体验。与此同时，在线游戏本身就是一个巨大产业，玩家数量惊人，锦标赛吸引的粉丝足可以坐满整个足球场。为了扩张和提高竞争力，游戏公司将采取媒体和科技业中更具有进取心的空间设计策略。兼顾灵活和定制、共用和个性化，高科技和以人为中心的空间设计能够加速创新。

这种革新正处在进行时。iPhone 已经成为设备组合的一部分。虚拟现实是一张外卡，创造沉浸式体验。数字和实体的整合是实现这一点的重要方式，虚拟现实是另一种方式。媒体趋向于汇聚，将互不相连的链条组合在一起以吸引受众的目光。随着链条的增加，汇聚需求也随之提高，其结果是：筒仓倒塌，革新加速。

Being close to each other will facilitate collaboration and innovation. The power of technology-focus on employee participation

彼此邻近将使协作和创新更加便利，科技的力量——重在员工参与

In the future, the technology companies will reflect the value of social responsibility and personal empowerment through the functions and policies of the office space. They look for flexible solutions to help solve the problems of sustainability, office efficiency, the convenience of collaboration, and innovative supply. They encourage more employees to participate through various procedures and spaces, while playing an important role in solving health and other individual and social issues.

未来的科技公司将通过办公场所的功能和政策体现社会责任和个人赋权的价值。他们寻找富有弹性的方案，帮助解决可持续性、办公能效、协作便利、创新供给方面的问题，通过各种程序和空间鼓励更多员工参与，同时在解决健康和其他个体与社会问题上扮演重要角色

Industrial design-product intelligence, handicraft return

工业设计——产品智能化，手工艺回归

Product design not only focuses on the visible physical world, but also focuses on the invisible interactive world beyond this category, improving them to become "intelligent" and integrating them into daily life experience. Focusing on the overall artificial environment can cover everything, improve the satisfaction of user experience and the humanization of information.

The Internet of Things will make products more intelligent. These products can not only interact with us, but also with each other. This means that while the product realizes self-management, it will also establish contact with people and the world through the network, and integrate with the network and influence each other. Intelligent products have the ability to support sharing, maintain self-management and order supply, which may change consumers' views on ownership.

The revival of handicrafts is similar to the arts and crafts movement that occurred from the end of the 19th century to the beginning of the 20th century. By the 21 century, handicrafts have stood on the opposite side of digital life. People associate products with their makers, artists, and craftspeople, hoping to find personal meaning in them. They look for traces of production on the products, and then treat them as handicrafts. At the same time, interest in production has re-emerged, and it is usually accompanied by ambitions to find a market for handicrafts. Small-scale producers will emphasize that local production is a sign of authenticity in order to attract wider attention.

产品设计不仅着眼于可见的物理世界，同时也着眼于超出这一范畴的不可见的交互世界，提高它们变得“智能”同时融入到日常生活体验。注重整体的人工环境能够包罗一切，提高用户体验的满意度和信息人性化。

物联网将使得产品更加智能化，这些产品不仅能够与我们进行互动，彼此之间也是如此。这就意味着产品在实现自我管理的同时，也会通过网络与人和世界建立联系，和网络互相融合，互相影响。智能化产品具有支持共用，维持自我管理和订购供给的能力，这一点可能会改变消费者对所有权的看法。

手工艺的复兴同发生在19世纪末到20世纪初的工艺美术运动相似。到了21世纪，手工艺已经站在了数字化生活的对立面。人们将产品和它们的制造者，艺术家以及手艺人联系在一起，期待可以在其中找到个人意义。他们在产品上寻找制作的痕迹，然后将其视为手工艺品。于此同时，对制作的兴趣再次兴起，而且通常会伴随着为手工艺品寻求市场的野心。小规模生产者会强调当地生产是真品的标志，以此吸引更广泛的注意力。

赋予金融企业优势的
便利设施从正门开始。

DEFENSE AND AEROSPACE-CONTINUOUS
ATTENTION TO THE VIGILANCE OF INNOVATION

金融服务—— 颠覆带来重塑

Financial Services-Disruption brings reshaping

A strong sense of mission and purpose—focusing on the world and/or a specific community—has a more important significance for these companies and their employees, which in turn has an impact on the physical and digital spaces. The financial services industry began to imitate the technology industry, through its own efforts to provide high-end convenience facilities while competing for top talent. In addition, retail banking services and private banking (or wealth management) will also completely reshape the consumer experience, increase the level of personalization of services, and improve the virtual banking experience, especially for smart devices.

As alternatives to traditional retail banks begin to compete with them to seize the market, competition has become more intense. This will inspire both new market participants and established banks to work hard to highlight their advantages. About this they What it will do is inconclusive, especially for large banks that must take into account multiple regions and demographic markets. The more prominent the focus, the simpler the task, but even so, continuous changes in technology can Disintegrate various plans quickly.

As technology simplifies transactions—or ceding transactions to artificial intelligence—the likelihood of collapse will only become greater. But this also provides opportunities for the financial industry to lead the development of assistive technologies in this industry. With the rise of technology-based working environments and the trend of matching financial technology accelerators with customers, the development of financial business in this area has shown a strong momentum.

强烈的使命感和目标感——着眼全球以及 / 或者一个特定的社区——对这些企业以及他们的员工有着更重要的意义，进而对物理空间和数字空间产生影响。金融服务业开始模仿科技业，通过自身努力提供高端便利设施同时争夺顶级人才。此外，零售性银行服务和私人银行（或称财富管理）也将彻底重塑消费体验，提高服务的个性化程度，同时改进虚拟银行体验，尤其是针对智能设备。

随着传统零售银行的替代者开始与他们抢占市场，竞争愈加激烈。这会激励新的市场参与者和老牌银行都努力突显自己的优势。对此他们将怎么做未有定论，特别是那些必须顾及多个区域和人口市场的大银行。焦点越是突出，任务就越简单，但即便如此，技术的不断变革也能够迅速瓦解各种计划。

随着技术简化了交易——或者说将交易让与人工智能——瓦解的可能性只会更大。但这也为金融业提供了机遇，引领该行业辅助技术的发展。随着科技型工作环境的兴起和金融技术加速器与客户搭配的趋势，金融业务在这一方面的发展已经表现出强劲势头。

Efficient office space will attract more talents and promote for high value-added services.
Professional Services Company—Transition to higher-value jobs
高效率的办公空间将吸引更多的人才，提供高附加值的服务。
专业服务公司——往更高价值的工作转型

Professional service companies will strive to become more comprehensive business consultants, providing customers with high value-added services, while improving the efficiency of traditional services. Their working environment must serve a wider range of working methods and professionals. Efficient office space can attract talented employees. Such employees desire high-value work that inspires their passion. Customers will also be attracted by such a space. The on-time fee-paying elites of professional service companies will arrange the clients' companies to carry out their work, using the office center as an anchor point, not an office. The office center will be an open environment with a lot of technology. As artificial intelligence takes over part of the work, professionals focus their energy on high-value work. Both they and the office will receive these supports. Independent contractors are another problem. Although their work lives are more flexible, working on demand also means low pay, irregular working hours and work insecurity. In the future, new employment models Will appear, neither full-time nor self-employed. In this case, the position and working environment will change accordingly. Some law firms may appear in the form of "brands" rather than corporations. The traditional boundaries between office space, residences and communities will be blurred. Affected by the design of hotels and residences, professional service companies will embrace this demand, provide employees with social spaces, and at the same time provide them with a variety of options in the use of office space. A deeper understanding of work processes and human experience can help fine-tune the workplace to improve work efficiency, creativity and job satisfaction.

专业服务公司将努力成为更全面的商业顾问，为客户提供高附加值的服务，同时提高传统服务的效率。他们的工作环境必须服务于更广泛的工作方式和专业人员。高效率办公空间能够吸引才能出众的员工。这种员工渴望能够激发他们热情的高价值工作。客户也将被这样的空间吸引。专业服务公司的按时收费精英将安排到的客户的工司开展工作，将办公中心作为一个锚点，而不是一间办公室。办公中心将是一个采用大量技术的开放式环境。随着人工智能接管部分工作，专业人员将精力集中到高价值工作上。无论是他们还是办公场所都将获得这些支持。独立承包者是另一个问题。虽然他们的工作生活更灵活，但按需工作也意味着低酬劳，工作时间不规律和工作不安全感。未来，新的雇佣模式将出现，既非全职，也非自雇。在这种情况下，职位和工作环境将所以发生变化。一些律师事务所可能以“品牌”的形式出现，而不是企业。办公场所、住宅和社区之间的传统界线将模糊。受酒店和住宅设计影响，专业服务公司将拥抱这种需求，为员工提供社交空间，同时在办公场所的使用方式方面为他们提供多种选择。加深对工作流程和人类体验的理解能够帮助办公场所微调，以提高工作效率、创造力和工作满足感。

GOVERNMENT- COST-EFFECTIVE, HOME AWAY FROM HOME, SAFE AND ADVANCED

政府——经济有效， 宾至如归，安全先进

"Retail-style" government services will move online, reducing the need for staff and physical infrastructure, because even voters who enjoy the most convenience will get services through digital channels. In order to seek higher efficiency, the government may follow the example of the medical system, consolidating some functions into service centers, while making other functions closer to the communities they serve. This usually happens in the infrastructure of the private sector, blurring the line between the public and private sectors.

To enhance security, physical barriers will be strengthened and are likely to be replaced by smart, technically-supported surveillance systems, which can protect government buildings and staff while providing a homely environment. As the technology becomes more complex and high-end, these systems will be able to detect, stop and resist various security threats such as drones, not limited to the boundaries of the building itself.

In addition, the government will instead look for design-building contracting and public-private partnerships to develop and operate its infrastructure, while not ignoring the goals of flexibility, health, and productivity. The participation of end users in planning and robust change management will increase employee satisfaction with the facilities they use.

“零售式”政府服务会向线上转移，从而减少对工作人员和实体基础设施的需求，因为即便是享受最多便利的选民们也会通过数码渠道来获取服务。为寻求更高的效率，政府可能会效仿医疗系统，将一些职能合并到服务中心，而使另一些职能离所服务的社区更近。这通常会发生在私营部门的基础设施中，模糊公有和私有领域的界线。

为加强安全，物理屏障会得到增强，且很有可能被智能的、有技术支持的监控系统所取代，因为后者能在提供一个宾至如归的环境的同时保护政府建筑和工作人员。随着技术日益复杂高端，这些系统将能够察觉、制止和抵抗无人机等各种安全威胁，不局限于建筑本身的场地界线。

另外，政府会转而寻求设计 - 建筑承包和公私合作关系来发展和运营其基础设施，而同时不忽视对弹性、健康和生产力的目标。最终用户在规划中的参与以及稳健的变更管理将提高员工对自己所用设施的满意度。

Non-profit organization-- Make the mission more visible and transparent

非盈利机构—— 让使命更加可视和透明化

As the public sector relies on non-profit institutions to fill the gaps in their own services, funding problems will follow, prompting them to consolidate their relationships with partners and find new partners.

Shared facilities are a potential solution, just like the strategy adopted by some holding companies, to integrate individual brands and maintain their identities while sharing support. Shared office

Place is another solution that promotes interaction and innovation.

In order to attract talents with limited resources, non-profit organizations have made their reason for existence more prominent, while at the same time improving personal empowerment. Given their "focus on a mission" culture and a working environment that conveys corporate goals, startups are enlightening for non-profit organizations. In this regard, the design principles that connect culture and location can have a very real and important impact, because non-profit organizations are always subject to the scrutiny of donors and the media. Negative publicity affects their fundraising and prevents them from fulfilling their mission. Therefore, it is necessary to make the operation transparent, and the office needs to reflect this.

Buildings and working environments that welcome community participation are very valuable, not just because donors hope that non-profit organizations will receive strong support from the grassroots.

随着公共部门依靠非盈利性机构填补自身服务的缝隙，资金问题将随之出现，促使他们巩固与合作伙伴之间的关系同时寻找新的合作伙伴。共享设施是一种潜在解决方案，就像一些控股公司采取的策略一样，将个体品牌整合到一起，在共享支持的同时保持各自的身份。共用办公场所是另一种解决方案，能够促进互动和革新。

为了用有限的资源吸引人才，非盈利性机构让他们的存在理由更为突出的同时，也在提高个人赋权。鉴于他们“专注于一项使命”的文化以及传递企业目标的工作环境，创业公司对非盈利性机构有着启迪意义。在这方面，连接文化和地点的设计原则能够产生非常现实而重要的影响，因为非盈利性机构始终受到捐助者和媒体的审查监督。负面宣传影响他们的资金筹集，阻碍他们完成自身的使命。因此让运作透明化是一个必要做法，办公场所也需要反映这一点。

欢迎社区参与的建筑与工作环境非常可贵，这并不仅仅因为捐助者希望非盈利性机构获得草根阶层的有力支持。

The partition of the side cabinet provides individuals with a private working space, which is very good for users who like to work quietly, so that they can be undisturbed in their own space and improve office efficiency. The door of the side cabinet can be pushed and pulled, which fully meets the storage needs of users, is convenient for storage and saves space.

通过侧柜的隔断给个人提供了私密的工作空间，这对于喜欢安静办公的使用者来说是非常好的，能让其在自己的空间里面不受干扰，提升办公的效率。侧柜柜门采用可推拉的方式，充分满足使用者的储存需求，收纳方便，节约空间。

SMOOTH SLIDING

推拉顺滑，抽底带轮子防前倾倒

Smooth push and pull, pull the bottom with wheels to prevent forward tipping

To enhance the user experience, the USB interface is combined with the sliding side cabinet, which does not occupy extra space when charging, and the atmosphere is beautiful.

提升用户的体验感，将 USB 接口与推拉侧柜相结合，充电的时候不占用多余的地方，大气美观。

WORKS SERIES

REED

Reed lives in shallow water or low wetlands, and can adapt to water in a wide range, from wet soil to perennial water, from a few centimeters to more than 1 meter deep, forming reed communities. The flower of reed is resilient, and its environment is very adaptable. May we, like the reed, grow and shine wherever we are.

芦苇生在浅水中或低湿地，对水分的适应幅度很宽，从土壤湿润到长年积水，从水深几厘米至 1 米以上，都能形成芦苇群落。芦苇的花语是韧性，它的环境适应能力很强，愿我们也像芦苇一样，无论在哪里，都能让自己不断成长，发光发亮。

沃克斯系列

STAFF SYSTEM

Office diversification, the pattern becomes bigger:

The diversified office layout helps users choose the most suitable product application based on the nature of work, mood and personality. Redefine the way of office work in the workplace with a new look.

办公多元化，格局变大：

多元化的办公场所布局有助于使用者根据工作性质、心情和个性来选择最适合的产品应用。以全新的面貌重新定义职场上的办公方式。

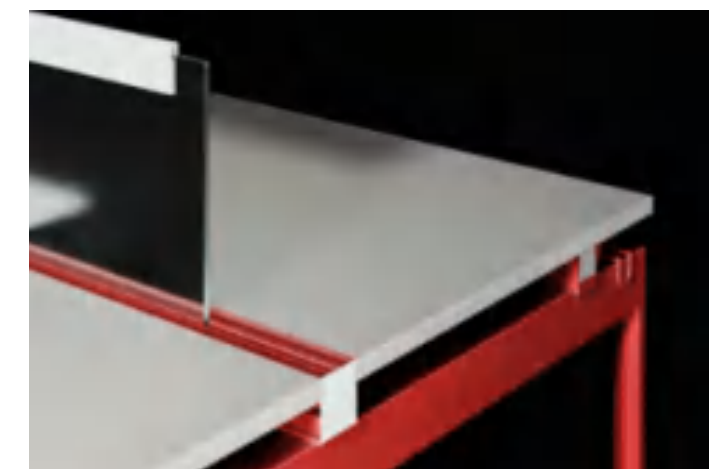

The natural choice:

The natural choice of working independently or in a team, the form of presentation goes beyond the limits of space.

自然的选择：

独立工作或团队工作的自然选择，展现形式超越空间的限制。

The various combinations and the changeable colors give you a refreshing feeling, which not only has a good expression in practical functions, but also can satisfy the visual experience.

多样的组合形式，多变的颜色，给人明快的感觉，不仅在实用功能上有了很好的表达，视觉感受也能得到满足。

Simplicity is a kind of fashion and go away from the complexity and discard the tedious modification. Simplicity is not to go with the flow. It is the experience of returning to nature. It is the pursuit of life. No matter how time is lost, it will always be distributed. With exquisite character.

简约是一种时尚，去繁从简，丢弃繁琐的修饰，简约并不是随波逐流，它是回归自然的体验，是对生活的追求，无论时间怎么流失，始终散发着精致的品格。

The clean geometric lines are combined into a smooth picture, and the elegant colors create a strict and gentle style. The overall look is more light, and the details make the elegance and sophistication better interpret. give office furniture new vitality, the reasonable layout, and the elegant color can reflect the designer's sincerity from the details in terms of aesthetics and comfort. Simple but not simple, to meet all your work needs!

干净的几何线，组合出流畅的画面，雅致的颜色创造出了一种严格又温和的风格。整体看起来更显轻盈，细节之处使得优雅与精致得到更好的诠释。赋予办公家具新的生命力。合理的布局，雅致的色泽，无论从审美还是舒适度，都能从细节之处体现出设计师的真诚。简约而不简单，满足您一切工作需求！

Simple and regular form, neat and orderly visual experience
简约规整的形态，整洁有序的视觉感受

Concise and practical method and the generous and decent appearance make the limited space full of infinite passion and can be more engaged in work.

简洁实用的的组合方式，大方得体的外观，让有限的空间充满无限的激情，工作时能更投入。

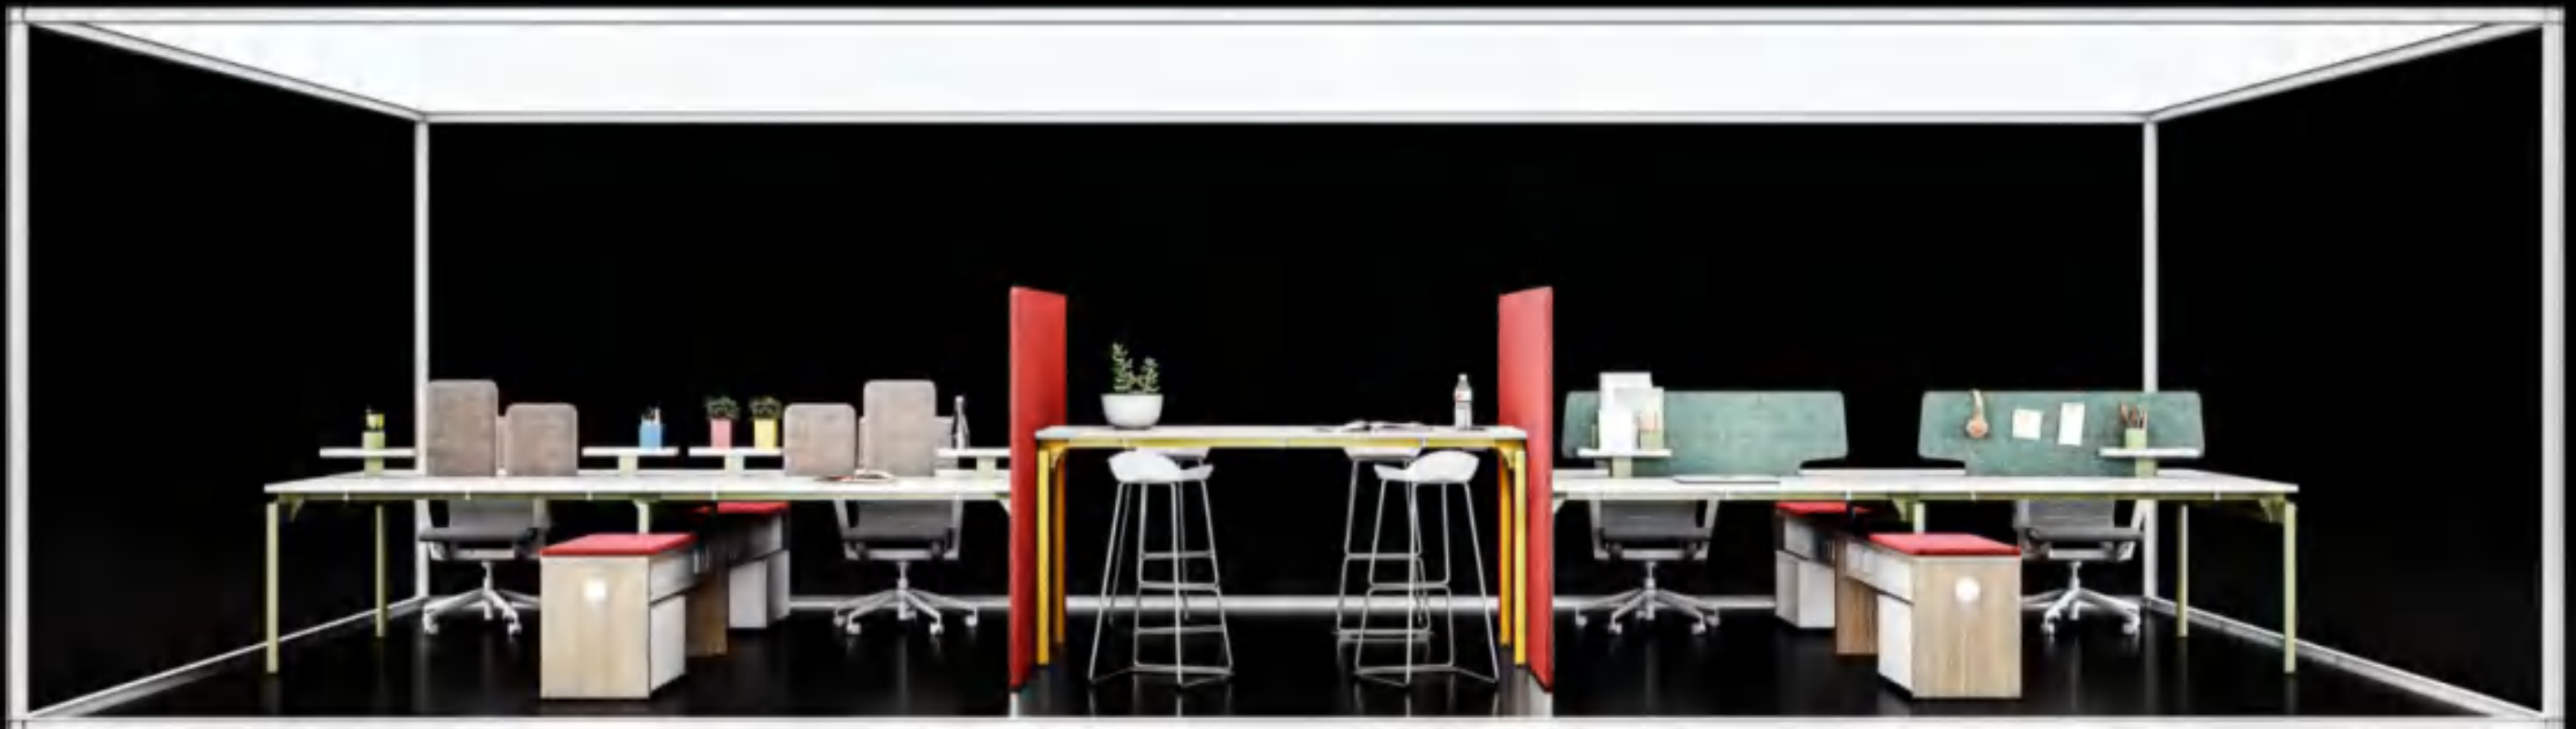

The style is fashionable and concise, the lines are smooth and not dull, the reasonable layout, and the elegant color can reflect the designer's sincerity from the details in terms of aesthetics and comfort. The concise design is refreshing, it throws away the complicated lines, improves work efficiency, and the flexible and changeable shape forms a new trend in the office.

造型时尚简洁，线条流畅不呆板，合理的布局，雅致的色泽，无论从审美还是舒适度，都能从细节之处体现出设计师的真诚。简洁的设计令人神清气爽，丢掉繁杂的线条，提升工作效率，灵活多变的造型，形成办公室的新风潮。

The power of simplicity creates a relaxing atmosphere,

Cable management: Utility model appearance and patented wiring island, brand-new design, beautiful appearance, practicality and connotation, bid farewell to messy wiring troubles, the wiring board can be removed by pulling it out. It is convenient to arrange wiring and check wiring problems. The 86-socket can be installed outside or inside. Does not affect the arrangement of lines.

走线岛：实用新型外观与专利走线岛，全新的设计，美观大方，实用有内涵，告别杂乱的线路烦恼，线板上提外拉即可取下来。方便整理线路与检查线路问题，86插座可外装也可内装，丝毫不影响整理线路。

棋奕 CHEER

蒲公英

DANDELION

风一吹，蒲公英们便踏上旅途，他们勇敢、自由、无畏，年轻的身姿随风自由自在地飞。它们也是有创意的、浪漫的。在无法知道自己会在什么地方，什么时间降落的情况下，享受未知、刺激的旅途。这不是很有趣吗？它们可能会落在人们头上、猫咪背上等等，每一次的降落都可能形成有趣的画面。过程可能短暂，但是充满意义。

As soon as the wind blows, the dandelions embark on a journey. They are brave, free, and fearless, and their young figures fly freely with the wind. They are also creative and romantic. Enjoy the unknown and exciting journey without knowing where and when you will land. Isn't this fun? They may fall on people's heads, cats' backs, etc. Each landing may form an interesting picture. The process may be short, but full of meaning.

OPEN WORKSTATION

OPEN WORKSTATION

OPEN WORKSTATION

OPEN WORKSTATION

- 地点与岗位 -

LOCATION AND POSITION

場所と役職

5、锚定：地点

为了保护自己免受工作环境中日益严重的疾病侵扰，每个人都需要频繁应对一件事，办公空间内部交通动线是否方便？我们需要有撤退空间为自己休整充电，组织和整理不断冲击我们的信息，让我们的想法再次流向新的行为。在办公室，我们需要使用的办公辅助设备越来越丰富，我们使用 PC、笔记本电脑、平板电脑或手机不断地切换个人与专注工作间的平衡，工作与个人隐私是否在办公地点全部暴露？这是我们想要的吗？在工作地点短暂的休息睡眠有增强判断决策的功效，这通常会产生奇迹，经过小睡，表达和专注的能力会大大提高，有效的工位间隔是个人工作地点的必要之一。

5. Anchoring: Location

In order to protect themselves from the increasingly serious diseases in the work environment, everyone needs to deal with one thing frequently. Is it convenient for the traffic inside the office space? We need to have retreat space to recharge ourselves, organize and organize the information that constantly impacts us, and let our thoughts flow to new behaviors again. In the office, we need to use more and more office auxiliary equipment. We use PCs, laptops, tablets or mobile phones to constantly switch the balance between personal and focused work. Are work and personal privacy exposed in the office? Is this what we want? A short rest and sleep at the work place can enhance judgment and decision-making. This usually produces miracles. After a nap, the ability to express and concentrate will be greatly improved. Effective work space interval is one of the essentials of a personal work place.

5. アンカー：場所

ますます深刻化する職場環境から身を守るためには、誰もが頻繁に一つのことに対処する必要がありますが、オフィス内の交通に便利ですか？私たちは自分自身を再充電し、常に私たちに影響を与える情報を整理して整理し、私たちの思考を新しい行動に再び流すための後退スペースを持っている必要があります。オフィスでは、ますます多くのオフィス補助機器を使用する必要があります。PC、ラップトップ、タブレット、または携帯電話を使用して、個人的な仕事と集中的な仕事のバランスを絶えず切り替えています。仕事と個人のプライバシーはオフィスで公開されていますか？これは私たちが欲しいものですか？職場での短い休息と睡眠は、判断力と意思決定を高めることができます。これは通常、奇跡を引き起こします。昼寝後、表現力と集中力が大幅に向上します。効果的な作業スペース間隔は、個人的な仕事の重要な要素の1つです。場所。

6、锚定：岗位

企业组织架构的逻辑是以不同岗位职能来进行划分，不管我们所处行业属性如何，内部的成员组成方式都是接近及类似的。事实上，办公家具针对按照不同岗位群体工作差异来设置不同的用户差异化是产品“以用户为中心”的起点与终点。我们需要明确，锚定不同岗位用户本身不是目的，而是适应办公功能形态发展变化的最终结果。在此，我们将屏风职员系统按三种岗位职能进行了有建设性的引导划分：
普通文职、客服、技术支持简素性工作岗位；
企业事业单位常规性、普适性工作岗位；
核心研发技术部门功能性办公家具工作岗位。

6. Anchoring: post

The logic of enterprise organization structure is divided into different positions and functions. Regardless of the nature of our industry, the internal composition of members is similar and similar. In fact, setting up different user differentiation for office furniture according to the work differences of different job groups is the starting point and end point of the product "user-centric". We need to make it clear that anchoring users in different positions is not an end in itself, but the final result of adapting to the development and changes of office functions. Here, we divide the screen staff system into three types of job functions for constructive guidance:
General clerical, customer service, technical support simple jobs;
Regular and universal jobs in enterprises and institutions;
Functional office furniture jobs in the core R&D technology department.

6. アンカー：役職

企業の組織構造の論理は、さまざまな職務に分かれています。業界の性質に関係なく、メンバーの内部構成は類似しています。実際、さまざまな職種の仕事の違いに応じてオフィス家具にさまざまなユーザーの差別化を設定することが、製品「ユーザー中心」の開始点と終了点です。ユーザーをさまざまな位置に固定すること自体が目的ではなく、オフィス機能の開発と変更に適応した最終的な結果であることを明確にする必要があります。ここでは、建設的なガイダンスのために、スクリーンスタッフシステムを3つのタイプの職務に分割します。一般的な事務、カスタマーサービス、テクニカルサポートの簡単な仕事。企業や機関での定期的かつ普遍的な仕事。コア R & D テクノロジー部門での機能的なオフィス家具の仕事。

互联网平台大厂、新能源智造、生命科技、国防科天、设计研究院校等核心研发技术部门、功能性工作岗位：

“创造”：知识工作者独特的创造性是推动世界进步的重要力量之一，企业的核心研发实力将决定公司未来持续成长的实力。未来的竞争是科技技术创造力的竞争，是高端人才资源的竞争，企业如果不具备吸引人才的能力，核心竞争力将如何实现巩固？企业的文化都由习惯形成，但除此以外，它和办公环境也有紧密关联。目前，全球竞争和颠覆浪潮正从各方来袭。显然，世界正在转变——而且变化十分急速。除此之外，还有一件事十分明确，那就是企业必须保持“创造”的思维、推动创新，才能在这个大环境下生存。要达到这个目标，企业必须变得更加敏捷灵活，鼓励不断学习，并且更迅速回应新的发展机遇。我们本着“敏捷创造”精神，研究出多种利用空间支持核心研发技术岗位更有创造力工作的办公方式，以下办公产品功能为这些研究的重点成果。这些初步发现既能配合研发个人和团队工作方式，也能支持研发人员在工作中调息身心。

- * **挂式显示设备可支持学习。**无论是单屏显示或是数字多屏显示，均可帮助研发人员留意到项目整体状态，有助于安排工作和控制进度。
- * **站立式可有效保护研发人员长时间工作的健康能量。**小组讨论行动的方向时，站立式交流能够加深有效性和快速性。这类型的交流应在研发的主要工作空间进行，以隔绝外来干扰。
- * **专注工作助力冲刺。**研发成员需要协助工作执行的收纳空间。一个可专心工作的个人空间是研发技术人员的必备，而这个空间应该保持一定的私密性，同时又能让他们与团队连结，这有助持续推进开发项目，更可增加研发团队对项目了解。
- * **伙伴配对和跨职能培训可避免进度停顿。**让研发技术人员在同一工作空间并肩工作，能帮助团队成员了解彼此的工作。跨职能培训则可确保项目不会因为员工请假而停滞不前。
- * **休息可为团队成员充电。**休息功能让研发技术人员完成需要高度专注的工作后，找到重振精神的空間。当然，有人会到咖啡厅或其他社交空间放松身心，但我们相信大部份研发技术人员更喜欢有个专属自己且宁静的地点小休。每个人的“充电”方式各有不同，我们高度尊重这种不同。

Internet platform giants / New energy smart manufacturing / Life Technology/ National Defense Science Day/ Design and research institutions and other core R&D technical departments/Functional jobs:

"Creation": The unique creativity of knowledge workers is one of the important forces driving world progress. The core R&D strength of an enterprise will determine the company's ability to continue to grow in the future. The future competition will be the competition of technological creativity and the competition of high-end human resources. If companies do not have the ability to attract talents, how will their core competitiveness be consolidated? Corporate culture is formed by habits, but in addition to this, it is also closely related to the office environment. At present, the tide of global competition and subversion is coming from all sides. Obviously, the world is changing – and it is changing very rapidly. In addition, there is one thing that is very clear, that is, companies must maintain a "creative" mindset and promote innovation in order to survive in this environment. To achieve this goal, companies must become more agile and flexible, encourage continuous learning, and respond more quickly to new development opportunities. In the spirit of "agile creation", we have developed a variety of office methods that use space to support more creative work in core R&D technical positions. The following office product functions are the key results of these studies. These preliminary findings can not only cooperate with R&D individuals and team work methods, but also support R&D personnel to adjust their body and mind during work.

- * **Hanging display device can support learning.** Whether it is a single-screen display or a digital multi-screen display, it can help R&D personnel pay attention to the overall status of the project, help arrange work and control progress.
- * **Standing position can effectively protect the healthy energy of R&D personnel working for a long time.** When a group discusses the direction of action, standing communication can deepen effectiveness and speed. This type of communication should be carried out in the main working space of R&D to isolate external interference.
- * **Concentrate on work to help sprint.** The storage space where R&D members need to assist in the execution of their work. A personal space where they can concentrate on their work is a must for R&D technicians. This space should maintain a certain degree of privacy and at the same time allow them to connect with the team. This helps to continue to advance the development project, and can increase the R&D team members' understanding of the project. Understanding.
- * **Partner matching and cross-functional training can avoid progress stalls.** Letting R&D technicians work side by side in the same workspace can help team members understand each other's work. Cross-functional training can ensure that the project will not stall due to employees asking for leave.
- * **Rest can charge the team members.** The rest function allows R&D technicians to find a room to rejuvenate after completing tasks that require a high degree of concentration. Of course, some people will go to coffee shops or other social spaces to relax, but we believe that most R&D technicians prefer to have a quiet place for their own rest. Everyone's "charging" method is different, and we highly respect this difference.

インターネットプラットフォームの巨人 / 新エネルギースマートマニュファクチャリング / ライフテクノロジー / 国防科学デー / 設計研究機関およびその他の中核的な研究開発技術部門 / 機能的な仕事：

「相乗効果」：知識労働者のユニークな創造性は、世界の進歩を推進する重要な力の1つです。企業のコア研究開発力は、企業が将来も成長し続ける能力を決定します。今後の競争は、技術創造性の競争とハイエンド人材の競争ですが、企業に人材を惹きつける能力がない場合、コアコンピタンスはどのように統合されるのでしょうか。企業文化は習慣によって形成されますが、それに加えて、オフィス環境とも密接に関係しています。現在、世界的な競争と転覆の流れはあらゆる側面から来ています。明らかに、世界は変化しています - そしてそれは非常に急速に変化しています。さらに、非常に明確なことが1つあります。それは、企業がこの環境で生き残るためには、「創造的な」考え方を維持し、イノベーションを促進する必要があるということです。この目標を達成するには、企業はより機敏で柔軟になり、継続的な学習を奨励し、新しい開発の機会により迅速に対応する必要があります。

「アジャイルクリエーション」の精神で、スペースを利用したさまざまなオフィス手法を開発し、研究開発の中核となる技術職でよりクリエイティブな仕事をサポートしています。これらの研究の主な成果は、以下のオフィス製品機能です。これらの予備調査結果は、R & D の個人やチームの作業方法に協力するだけでなく、R & D の担当者が作業中に体と心を調整するのにサポートすることもできます。

- * **ハンギングディスプレイデバイスは学習をサポートできます。** シングルスクリーンディスプレイであろうとデジタルマルチスクリーンディスプレイであろうと、R & D 担当者がプロジェクトの全体的なステータスに注意を払い、作業を調整し、進行状況を制御するのに役立ちます。
- * **※立位は、長時間働く研究開発者の健康エネルギーを効果的に保護します。** グループが行動の方向性について話し合うとき、立ちコミュニケーションは効果とスピードを深めることができます。このタイプの通信は、外部干渉を分離するために、R & D のメイン作業スペースで実行する必要があります。
- * **スプリントを助けるために仕事に集中してください。** 研究開発メンバーが作業の実行を支援する必要がある保管スペース。研究開発技術者にとっては、仕事に専念できるパーソナルスペースが必須です。このスペースは、ある程度のプライバシーを維持し、同時にチームとつながることができるようにする必要があります。これにより、開発プロジェクトを継続的に進めることができます。プロジェクトに対する R & D チームメンバーの理解を深めることができます。理解。
- * **パートナーのマッチングと部門の枠を超えたトレーニングにより、進捗の停滞を回避できます。** R & D 技術者を同じワークスペースで並べて作業させると、チームメンバーがお互いの作業を理解するのに役立ちます。部門の枠を超えたトレーニングにより、従業員が休暇を求めたためにプロジェクトが停滞しないようにすることができます。
- * **休憩はチームメンバーに請求できます。** 残りの機能により、R & D 技術者は、高度な集中力を必要とするタスクを完了した後、若返りの余地を見つけることができます。もちろん、コーヒESHOPやその他の社交スペースに行ってリラックスする人もいますが、ほとんどの研究開発技術者は、自分の休息のために静かな場所を好むと考えています。「充電」の方法は人それぞれ異なり、私たちはこの違いを高く評価しています。

用户二 USER TWO ユーザー 2

国有企事业单位、成熟企业组织、大型集团公司常规性、普适性工作岗位：

“协同”：企业经营的边界由团队的协同性决定，打破内部“部门墙”边界是协同客户取得成果的重要起点，在开源的时代，协同企业的客户与供应链伙伴成为连接的重要资源力量，与强者同行我们必将更加强大。相互信任，善于合作的员工是企业最大的财富，充分考虑契约主体之间的关系性，形成有效的制度保障，尊重知识、尊重个性、集体奋斗和不迁就有功的员工，是我们事业协同成长的内在要求。爱自己、爱同事、爱事业和爱生活是我们凝聚力的源泉。管理灵活性、制度去控制化，项目小组制、组织去中心化；责任意识、创新精神、敬业精神和团结合作精神是企业文化的精髓。办公家具组织形态决定企业“协同”性的强弱，当我们将办公家具从产品属性转换为工具属性后，必然发现，在固定空间内“人”的动能如何产生更有效的协同，办公家具将成为最重要的工具载体，协同人、空间、工具必然产生更大价值。“开放式职员桌”与“屏风职员桌”哪一种产品解决方案更能平衡企业组织运作的协同性？我们建议国有企事业单位、成熟企业组织、大型集团公司采用“屏风职员桌”会更具协同性。

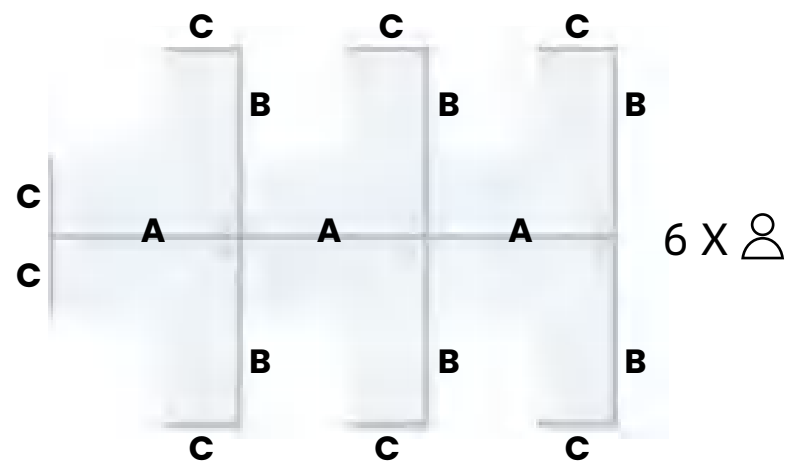

Regular and universal jobs in state-owned enterprises and institutions, mature enterprise organizations, and large group companies:**"Synergy":** The boundary of business operation is determined by the collaboration of the team. Breaking the internal "departmental wall" boundary is an important starting point for collaborative customers to achieve results. In the era of open source, collaborative corporate customers and supply chain partners have become important resource forces that connect with the strong. Together we will be stronger. Employees who trust each other and are good at cooperation are the greatest wealth of an enterprise. We fully consider the relationship between contract subjects and form an effective system guarantee. Respect for knowledge, respect for individuality, collective struggle, and employees who are meritorious, are the growth of our business. Intrinsic requirements. Loving yourself, loving colleagues, loving career and loving life are the source of our cohesion. Management flexibility, system de-control, project team system, organization decentralization; sense of responsibility, innovation spirit, dedication and unity and cooperation spirit are the essence of corporate culture. The organizational form of office furniture determines the strength of the company's "synergy". When we transform office furniture from product attributes to tool attributes, we must discover how the kinetic energy of "people" in a fixed space can produce more effective collaboration. To become the most important tool carrier, the collaboration of people, space, and tools will inevitably produce greater value. Which product solution, "Open Staff Desk" or "Screen Staff Desk", can better balance the synergy of corporate organization operations? We suggest that state-owned enterprises and institutions, mature enterprise organizations, and large group companies use "screen staff desks" to be more collaborative.

国营企業や機関、成熟した企業組織、および大規模なグループ会社での定期的かつ普遍的な仕事：

「相乗効果」：事業運営の境界はチームのコラボレーションによって決定されます。内部の「部門の壁」の境界を破ることは、コラボレーションの顧客が結果を達成するための重要な出発点です。オープンソースの時代では、コラボレーションの企業顧客とサプライチェーンパートナーは強者となつながら重要な資源力私たちは一緒に強くなるはず。お互いを信頼し、協力することが得意な従業員は企業の最大の富です。私たちは契約対象間の関係を十分に考慮し、効果的なシステム保証を形成します。知識の尊重、個性の尊重、集団的闘争、そして功績のある従業員は私たちのビジネスの共同成長。本質的な要件。自分を愛し、同僚を愛し、キャリアを愛し、人生を愛することが私たちの結束の源です。管理の柔軟性、システムの制御解除、プロジェクトチームシステム、組織の分散化、責任感、イノベーション精神、献身と団結、協力精神は企業文化の本質です。オフィス家具の組織形態は、会社の「相乗効果」の強さを決定します。オフィス家具を製品属性からツール属性に変換するとき、固定空間内の「人」の運動エネルギーがどのように効果的なコラボレーションを生み出すことができるかを発見する必要があります。最も重要なツールキャリアになると、人、スペース、ツールのコラボレーションは必然的に大きな価値を生み出します。「オープンスタッフデスク」または「スクリーンスタッフデスク」のどちらの製品ソリューションが、企業組織の運用の相乗効果のバランスをよりよくとることができますか？ 国营企業や機関、成熟した企業組織、および大規模なグループ企業は、より協調的にするために「スクリーンスタッフデスク」を使用することをお勧めします。

用户三 USER THREE ユーザー 3

普通文职、客服、技术支持、简素性工作岗位：

“效率”：如何确保企业普通员工工作是高效的？这成为新世纪企业经营管理最大的难题。管理的本质是使知识转变为生产力，然而，今天的知识工作者的生产力跟 19 世纪的体力劳动者的生产力一样低。彼得·德鲁克于 1999 年创作《21 世纪的管理挑战》评价说，20 世纪管理最重要，最实际也是真正独一无二的 中体力劳动者的生产力提高了 50 倍之多。在 21 世纪，管理需要做出的最重要挑战，就是如何提高知识工作者的生产力。我们肯定有效的组织管理、企业文化、团队氛围对效率的提升是决定性要素，但同时，工具的作用价值 也绝不可以忽略，办公家具作为每个员工工作效能实现最直接的领地，如何提供匹配适应普通员工工作诉求的办公家具产品？这需要 we 站在员工的立场角度去洞察思考。“开放式职员桌”与“屏风职员桌”本质上都是服务于员工工作效率的工具，哪种工具更适合，我们建议让更多员工参与选择。明智的决策带来员工工作效率的提升，产生的回报将比办公家具本身价值高得多，这将是企业经营管理最理性的投资思维。

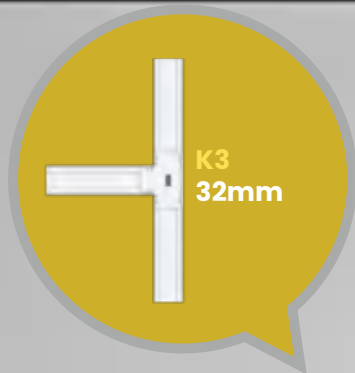

General clerical, customer service, technical support, and simpl jobs:

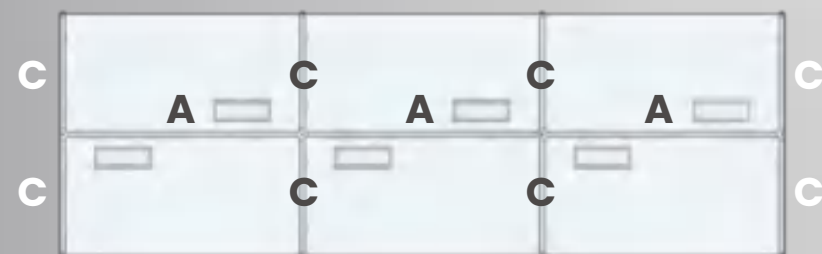

"Efficiency": How to ensure that the work of ordinary employees in the company is efficient? This has become the biggest problem for business management in the new century. The essence of management is to transform knowledge into productivity. However, the productivity of today's knowledge workers is as low as that of manual workers in the 19th century. Peter Drucker wrote "Management Challenges in the 21st Century" in 1999 and commented that the most important, practical and truly unique contribution of management in the 20th century is to increase the productivity of manual workers in the manufacturing industry by as much as 50 times. In the 21st century, the most important challenge that management needs to make is how to improve the productivity of knowledge workers. We affirm that effective organization and management, corporate culture, and team atmosphere are the decisive factors for improving efficiency, but at the same time, the value of tools must not be ignored. Office furniture is the most direct territory for each employee's work efficiency. How to provide matching Office furniture products that meet the work demands of ordinary employees? This requires us to have insight and thinking from the perspective of employees. "Open staff desk" and "screen staff desk" are essentially tools that serve employees' work efficiency. We recommend that more employees participate in the selection of which tool is more suitable. Wise decision-making will increase the work efficiency of employees, and the return will be much higher than the value of office furniture itself. This will be the most rational investment thinking for business management.

一般的な事務、カスタマーサービス、テクニカルサポート、シンプルでシンプルな仕事：

「効率」：会社の一般従業員の仕事が効率的であることをどのように保証するか？これは、新世紀の経営にとって最大の問題となっています。管理の本質は知識を生産性に変えることですが、今日の知識労働者の生産性は 19 世紀の手動労働者の生産性と同じくらい低いです。Peter Drucker は、1999 年に「21 世紀の経営課題」を書き、20 世紀の経営の最も重要で、実用的で、真にユニークな貢献は、製造業の手動労働者の生産性を 50 倍も向上させることであるとコメントしました。21 世紀において、経営者がしなければならない最も重要な課題は、知識労働者の生産性をどのように改善するかです。効果的な組織と管理、企業文化、チームの雰囲気は、効率を向上させる決定的な要因であると同時に、ツールの価値を無視してはなりません。オフィス家具は、各従業員の作業効率にとって最も直接的な領域です。普通の従業員の仕事の要求を満たす、一致するオフィス家具製品をどのように提供するのですか？そのためには、従業員の視点からの洞察と思考が必要です。「オープンスタッフデスク」と「スクリーンスタッフデスク」は、本質的には従業員の作業効率を高めるツールです。より多くの従業員がどちらのツールに適しているかを選択することをお勧めします。賢明な意思決定は従業員の仕事の効率を高め、リターンはオフィス家具自体の価値よりもはるかに高くなります。これは経営管理にとって最も合理的な投資思考です。
