EDGE BANDING

Alumina material edge banding: it is the most simple decoration as well as edge banding. The aluminum edge sealing is like an indispensable seasoning in delicious dishes, adding the finishing touch.

There is beauty and style: There are high and low, light and heavy. Responding to each other and balancing each other, this kind of side cabinet collocation will not grab the focus of the space, but will add a wonderful sense of hierarchy to the space. During the meeting: the desktop is spacious, and the conversation is more relaxed in an instant. The color is distinct, the modern fashion is strong, and the sense of hierarchy is strengthened. There is ample space for knees under the table, which avoids the embarrassment between the legs and focuses more on the meeting. The socket adopts a pressing lifting socket, which avoids the trouble of finding a power source when electricity is needed, and is neat and clean and more professional. Press the lifting socket for wireless charging, which is smarter and more convenient.

During the meeting: the pure white conference table will be more simple overall. There is no other extra color to add, but it will be more capable and crisp. Simplicity can better reflect its sophistication, and existence is decoration. While having a pleasant meeting, it can also be pleasing to the eyes. In addition, pressing the lifting socket is also an important reason for improving the aesthetics. It avoids the clutter of using power strips, and can be wirelessly charged, which is smarter and more convenient.

Space will change behavior, and fixed behavior will form a culture. Therefore, the working environment cannot be ignored. Color is one of the reasons for the formation of space atmosphere. Light colors can make people feel calm, peaceful and away from the noise. White is the classic choice among them. Calmness without losing elegance, agility without losing fashion.
